## Skills

- **HTML and CSS3**
- Javascript : **jQuery**, **Prototype**, Scriptaculous, Google Map Api, but also **low level JS (DOM management)**
- Environment : **Windows™** all versions since '98', **Linux** since my studies, **Mac OS X™** since the unibody Macbook™
- **Photoshop** : CSS development drafting, Photo post-production, some graphical works.
- Programing : Early with C, and Assembler, then **Java**, **PHP**, **XML and his friend XSL**.
- Data storage : **SQL** and Oracle, but let's be honest, not a lot of practice in recent years. Ditto for **LDAP**.
- Professional Software : **Neolane** (ECRM, administration and development), Eptica (customer mailing management), Iplanet
- Used editors : **Pspad**, **Eclipse**, **Aptana/Zen Coding**, Bluegriffon, UltraEdit, notepad.exe, my notebook and my pen.
- Versioning : getting started with **CVS**, **SVN** in recent years.
- Known Servers : **Apache**, **Tomcat** (and both at once), jBoss, Geronimo
- Language : I understand, read and speak English and Spanish, in addition to French. I try to learn Turkish.

## About me

Web worker, css mechanic, javascript handyman, but above all f2.8 aperture, perfect light and a bit too long exposure lover: [I am an amateur photographer](#) during my travels and free time.

I have also tried to put a few vinyls one after the others to put the songs together, this what we commonly call djing, but my passion for photography has step by step replaced the one for the turntables.

When I was a child I wanted to drive trains, be a points man then finally wanted to design them. Weird passion that then attracted me to everything working with electricity, steam or elbow grease. I was definitely too curious to not be interested in the world wide web.

I can't tell that I am a running champion, but you can always ask me for a few breast strokes in the city swimming pool. Although I don't pretend to be an alive IMDB, my unlimited cinema card pushed me to regularly go to the movies.

My friends tell that I am persevering even headstrong, but always willing to serve. They also call me WikiCed, or Handyman, I have to confess that the last one is from friends who are not very dexterous...
